When Things Get Challenging

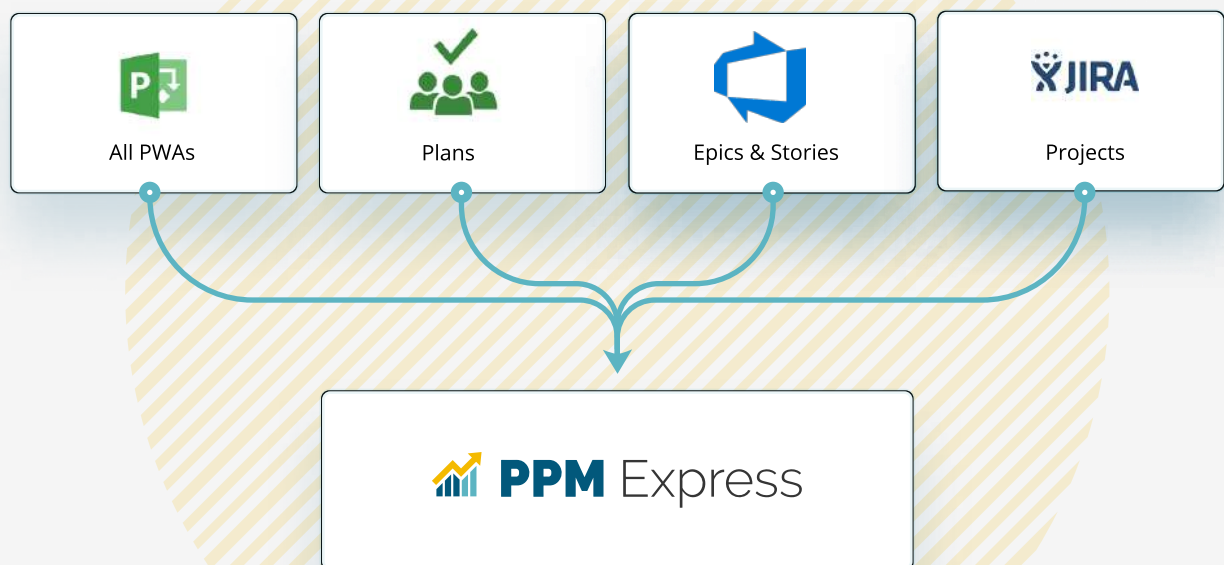

- 1 Do you have a user-friendly visual status management dashboard of projects you manage in Microsoft Project Online?
- 2 Are you happy with Microsoft Project reporting functionality or there is a need for deeper insights sometimes?
- 3 Do you know what's going on with projects that are managed in different PWA, in Azure DevOps or in Microsoft Planner?

Executives of modern organizations feel the same pain: there is no easy way to get the “big picture”.

Project Online Portfolio Management with PPM Express

- Connect all your PWAs, Planner, Jira, Azure DevOps, create portfolios and track the “big picture”
- See aggregated project information across teams, departments and divisions
- Manage statuses and releases in a one comfortable dashboard
- Support flexibility while getting instant progress reports

Solution Features

The main goal of PPM Express is to provide project portfolio visibility toolset, which is missing when it comes to status reporting from different PWAs or when some projects are managed outside Project Online, and so is reporting of any kind. PPM Express allows to see across all your projects, teams, departments so that executives and teams are always on the same page as to how the projects are going.

Transform your business processes with visual project portfolio reporting that make difference and extend significantly the transparency of your project delivery, employ business intelligence and analytics to make decisions faster.
