

What is Project Portfolio Management?

www.ppm.express

Definition

Project Portfolio Management is about deciding where best to focus the organization's resources in order to meet strategic objectives.

Project Portfolio Management is all about making decisions which projects or initiatives should be pursued, which should be abandoned, and where resources can be re-allocated to programs or initiatives that better align with a company's strategic goals.

PPM Approach

Strategy is executed via **Projects**

Strategy is delivered by **Prioritized Portfolio of Projects**

Investments made via **Projects**

Resources effectively assigned via **Resource Planning**

Benefits realized as result of outcomes from **Projects**

Strategy

Vision is executed via **Strategy**

Strategy executed
via Strategic Plan

Set of **Strategic
Initiatives**

Strategic Initiatives executed via set of **Optimized
Portfolios of Projects**

**Vision, Strategy, Optimized Portfolio together with
Leadership, well-defined Project Portfolio Management
Process and PPM Tool are PPM cornerstones**

Why Portfolio Management?

Benefits of Project Portfolio Management

- ✓ Competitive Edge
- ✓ Faster value realization
- ✓ Higher ROI
- ✓ Lower risk and risk management plans in place
- ✓ Effective resource allocation and utilization
- ✓ Effective investment management
- ✓ Realistic view of strategy implementation
- ✓ Fast speed of adoption to change
- ✓ Open, Innovative, customer-centric organization

Portfolio Governance

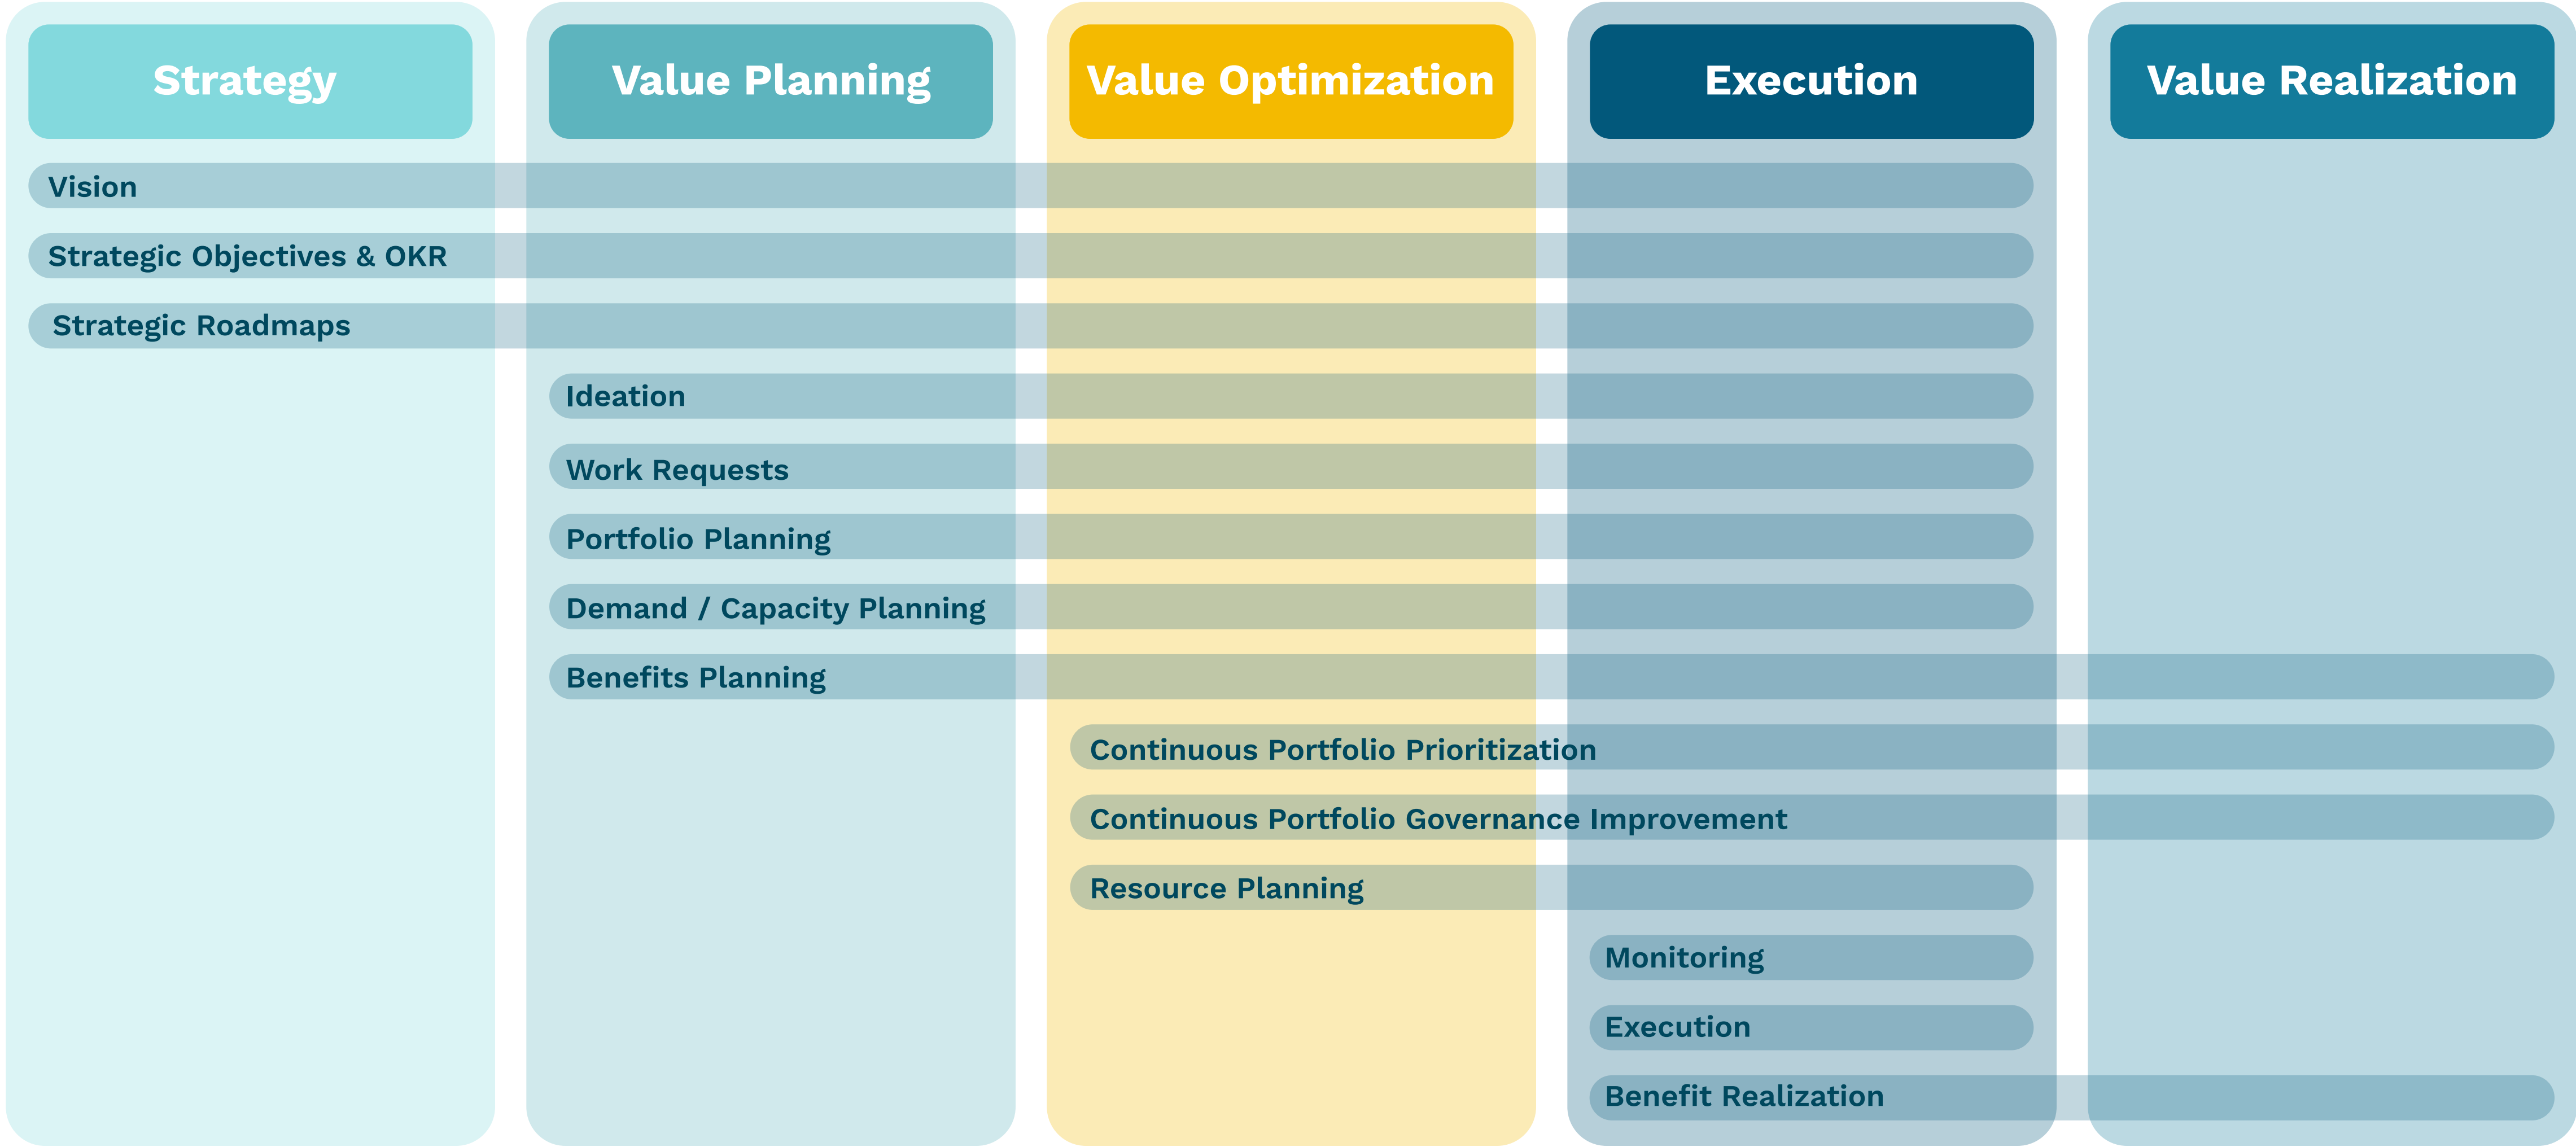

As per Project Management Institute (PMI),
Portfolio Governance is termed as

“The framework, functions, and processes that guide portfolio management activities to optimize investments and meet organizational strategic and operational goals”.

The goal of **Portfolio Governance** is to ensure that organization delivers maximum return on investment with an acceptable level of risk.

Portfolio Governance need to be adjusted to the size of organization and portfolio. Complex Governance with small portfolio will result in low speed and high bureaucracy.

Vision

Vision

What is our motivation?
Which positive outcomes we expect?

Target Group	Needs	Solution	Business Objectives
Which markets / market segments we are targeting?	What problems do we plan to solve? Which benefits will we provide?	What is it? What makes it stand out?	How will it benefit our company? What are the business objectives?

A company or organization's **vision statement** concentrates on the inherent prospect of the company's destiny - it is about what they are heading to be.

The **vision statement** describes what the company aspires to be. The vision statement outlines the core ideas of the organization and provides a roadmap for where it wants to go.

Strategic Priorities

Strategic priorities are the objectives that company aims to achieve over a specific time period. They are often the core values and large initiatives the company wants to achieve. Strategic priorities are usually unique to a specific organization and its goals.

Strategic priorities are part of a company's core culture with its purpose and philosophy to help guide the organization to its future success.

Strategic priorities for organizations can adjust as the internal and external environments change.

OKR stands as **Objectives and Key Results**, a goal management system that helps organizations build and implement the strategy.

The OKR framework's advantages include a robust emphasis on target results, increased visibility, and better strategic consistency.

In order to move from point A to point B, a Organization needs to achieve several **Key Results**, which are the outcomes it needs to obtain to reach the goal.

All the things the team does to achieve Key Results are called initiatives.

Strategic Roadmaps

Strategic Roadmap is a bridge (link) between strategy and execution. The Strategic Roadmap is a visualization of the company's strategic plan.

It gives the company a complete view of what is going to happen. The product / portfolio management team can employ a roadmap to facilitate the strategy discussion—the roadmap guides prioritizing initiatives, assigning resources, and tracking dependencies. The Strategy Roadmap provides a visualization of critical outcomes that must be achieved at a specific time to achieve the organization's strategic vision

Idea management, also called **Innovation Management**, structures the process of gathering insights on products and services, change requests and project proposals from employees, and then organizing and managing those suggestions for improvement or development.

Ideas, Feedback and Requests can be solicited from employees, stakeholders, customers, or multiple groups with the aim of improving offerings and services. Ideas and requests are collected from all areas of the organization.

Customer Feedback Management

Customer Feedback Management is the business process of collecting customer feedback to help improve products offered by companies.

For optimal **Customer feedback Management**, organizations must use some feedback management system, which is the combination of software tool and business processes that enables the customer feedback loop.

- It costs **5x to 25x more money** to acquire a new customer than keep existing ones happy.
- Highly-engaged customers **buy 90% more often and spend 60% more** per transaction.

PROJECTS

Portfolio view ▾

Not Started

In Progress

Project Portfolio Planning is a framework that strategically evaluates existing and potential projects by their prospective successes and risks, costs and benefits, then designates staff, resources, and timelines in a way that maximizes organizational performance.

Focusing on individual projects increases the **risk of non-optimal operations**. With centralized management and planning of projects as a portfolio, organizations can focus efforts and resources on the right projects at the right time.

Portfolio Investment Planning

Portfolio Investment Planning or Project Portfolio Financial Planning is the key aspect of Portfolio Management. Portfolio Management focuses on maximizing return on the investments in initiatives.

Portfolio Investments are made into multiple projects, and portfolio management focuses on managing these investments. Monitoring the costs and progress of the ongoing projects is important as it should not be exceeding budget assigned and should result in expected fiscal and non-fiscal outcomes.

Benefits Realization Management (BRM) is a methodology that measures how projects and programs deliver value and contribute to business and strategic objectives. BRM maximizes the ROI from the project execution and planning process.

Benefits Realization is all about identification and tracking tangible and intangible benefits from projects and programs following the completion of that work via deliverables and outcomes. Benefits realization management involves tracking the quantitative benefits realized because of the project delivery.

Successful Benefits Realization is a practice that helps organizations ensure receiving the intended benefits from projects and programs.

Portfolio Roadmaps

Portfolio Roadmap is a visualization of the strategy and timeline for all portfolio projects and initiatives across entire organization or specific portfolio.

Portfolio Roadmaps showcase multiple program, projects, product plans on a single roadmap to help executives and leadership understand how each initiative relates to the overall goals of the organization.

A centralized view ensures that each initiative in the portfolio aligned with strategy. Without a product portfolio roadmap, organizations run the risk of working on initiatives that are inconsistent with the organization's goals.

Continuos Prioritization is the foundation for successfull implementation of strategy. It's where you align your projects to strategy. It's where you win executive sponsorship and support. It's where you identify and eliminate low priority projects.

Project prioritization can help with:

- Aligning your projects with your strategy
- Quantifying projects that add value and which don't
- Balancing the set of projects you can take on with your capacity

Resource Allocation Planning is a practice of strategic planning to identify the skills required, the number of resources required for those specific skills at what intervals and for how long to deliver the project by expected date.

Resource Allocation Planning is an end-to-end planning, allowing organizations assess resources availability and allocating them effectively on projects. The ultimate objective is to optimize allocating of limited resources among the various projects and business units.

Portfolio Monitoring

Project Portfolio Monitoring refers to a process used by project managers and project management organizations (PMOs) to monitor and analyze current state and the potential return of project delivery. Organizing and consolidating all data related to proposed and current projects, project portfolio managers obtain the ability to see the big picture of all work streams in the organization.

By monitoring project execution and seeing the big picture, organization can ensure continuous alignment with goals and objectives of the organization, make better and faster decisions.

Resource utilization Management is the practice of measurement of how your resources are currently used, their capacity and availability.

Resource utilization helps organizations plan how to utilize resources optimally to ensure that organization operates as effective as possible.

Effective utilization of resources is extremely useful for both employees and employers. Not only does it ensure that employees have enough work; it also helps prevent burnout as result of the overallocation.

Risk Management or Enterprise Risk Management is the processes of identification, assessment, management, monitoring and mitigation of potential risks. The ultimate objective is to minimize the negative impact that risks might cause to an organization.

Risks include personnel issues, vendor ability to deliver, technology risks, data breaches, operational disruptions & failures, economic or political crises and natural disasters. Established risk management process helps organizations identify which of risks pose the biggest threats, and then implement the best mitigation measures to those risks.

Continuos Prioritization is the foundation for successfull implementation of strategy. It's where you align your projects to strategy. It's where you win executive sponsorship and support. It's where you identify and eliminate low priority projects.

Continuos Portfolio Prioritization objective is to balance inflow of new initiatives and new changes vs stream of work in progress in order for all work to be aligned with strategic priorities and ensure maximum return of investment.

Outcome Management / Benefit Realization Plan

Benefits Identification						
Benefit ID	Status	Benefit Name	Benefit Owner	Benefit Type	Reduce/Increase	Recurring Benefit

Benefits Realisation Plan								
Metric	Unit of Measure	Measurement Mechanism	Measurement Frequency	Benefit Baseline	Baseline Date	Benefit Realisation Target	Benefit Realisation Start Date	Benefit Realisation End Date

Benefits Realization Plan is all about tracking tangible and intangible benefits from projects and programs following the completion of that work via deliverables and outcomes.

Portfolio Reporting

The PPM system should provide information derived from the project and portfolio data. This is what the **PPM reports** are for.

They help organizations with:

- realize what is currently happening.
- what needs to be decided.
- monitoring and measuring quality of planning and execution
- provide data for an analysis, custom queries, and research

PPM Express is using **Microsoft Power BI** as a world-leading platform for data analytics and reporting.
